

The Original Gypsy Gripper™

Weighing in at just 8 ounces, *The Gypsy Gripper* is 3-1/2" wide and 11-3/8" long and 3-1/8" high.

A great new way to hold your rulers in place, *The Gypsy Gripper* makes using them easier and safer than ever before. It's a must-have tool for quilting!

The Gypsy Gripper has a comfortable grip handle, and two large round suction cups with handy lock & release levers. Just press the suction cups to any plastic quilter's ruler with a smooth surface, then flip the levers to lock *The Gypsy Gripper* in place. Now you can move the ruler quickly, and easily hold it on the exact position with gentle downward pressure. Your ruler hand will be up and away from the fabric, and out of harm's way if you happen to slip with the cutter. When you need to switch to another ruler, just flip the locking levers to release *The Gypsy Gripper*.

Both ends attached to a long ruler.

One end attached to a shorter ruler.

The Gypsy Gripper's suction cups will work with smooth surface rulers that are at least 4" wide, including most rectangle, square, or triangle shapes (with no slots or holes in the areas that will be covered by the suction cups). Use it with just one end attached on square or triangle rulers and it still grips perfectly, you can let the other end rest on the table while you hold in place and cut. The sculptured handle and enhanced rubberized grip make *The Gypsy Gripper* easy to position and comfortable to hold, even during the longest cutting sessions. A quilter's dream come true!
